

**Pythagorean Theorem** 

Pythagorean Theorem

 $a^2 + b^2 = c^2$ 

Distance in one dimension

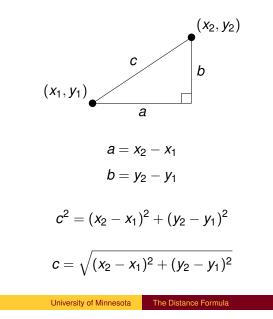

x-distance = 5 - 2 = 3

## Distance in two dimensions

## **Distance Formula**

## Recap

Find the distance between  $(x_1, y_1)$  and  $(x_2, y_2)$ .

University of Minnesota

The Distance Formula

**Distance Formula** 

$$c = \sqrt{(x_2 - x_1)^2 + (y_2 - y_1)^2}$$
